DECISION MAKING REGARDING THE SETTING OF QUOTA

Whereas, The Quota Range process has proven to be an effective tool in optimizing the number of Potential New Members matched and in achieving parity where possible; and

Whereas, voting on Quota is an outdated practice associated with previous Quota setting methods, which could jeopardize Panhellenic goodwill and increase the risk of a non-optimal outcome;

Resolved, Where Quota Range is used, Quota shall be determined by mutual agreement of the Panhellenic Advisor and either the Release Figure Specialist or the National Panhellenic Conference Area Advisor.

(Adopted at the NPC Biennial Session, October 2005)
